AI attacks fast. Intune + Splashtop move faster.

MOVE FASTER Shrink the time from issue to fix

Remote Support

Is supporting unattended, BYOD or cross-tenant devices a challenge?

Fix issues fast on any device, attended or unattended, with privilege elevation, file transfer, session recording and more.

For any device, anytime

AI App Packaging

Are third-party and custom app gaps leaving vulnerabilities open while you package by hand?

Deploy and patch 1,000+ ready-made and custom apps fast. AI packages, tests and malware-scans every app, then publishes to Intune in one click.

No E5 required

Real-Time Patching

Waiting on device check-ins to apply critical patches?

Patch Windows, macOS and third-party apps in real time, prioritized by KEV and CVE risk, with inventory and logs that prove every fix.

No check-in wait

ADD LAYERS One failed layer shouldn't mean a breach

Cloud RADIUS + PKI

Still relying on on-prem RADIUS or shared Wi-Fi passwords?

Passwordless, certificate-based Wi-Fi and VPN access, deployed through Intune. Less credential theft, no on-prem servers.

Pairs with Cloud PKI

Anti-Phishing

Is Defender your only line of defense against phishing and scams?

A second set of eyes on every click, side by side with Defender, managed in the same console as support and patching.

Shield first, Defender second
