

Splashtop to Ship on Millions of ASUS Motherboards, Starting with P5Q Family

Product now available on twelve motherboard models

May 14, 2008 – SAN JOSE – DeviceVM, the award-winning developer of Splashtop™, today announced the proliferation of their innovative software across four new models of ASUS motherboards. ASUS, the leading worldwide motherboard, components and notebook manufacturer, has integrated Splashtop onto the new P5Q family of products, bringing their offering of Splashtop-enabled motherboards to a total of twelve. The new models are: P5Q Deluxe, P5Q-WS, P5Q3 Deluxe, and P5Q-E.

“We are excited to have expanded our partnership with ASUS across many product lines,” says Mark Lee, co-founder and CEO of DeviceVM. “ASUS is not only a leading innovator in computer hardware, but is actively improving the entire PC consumer experience through software. We are excited to jointly drive the market innovation with ASUS.”

Branded “Express Gate” by ASUS, Splashtop enables users to access the Internet seconds after turning on their PC. Splashtop premiered on high-end ASUS motherboards in October 2007 and launched on mainstream M3 series in January 2008. The newest motherboards will be available in the second quarter of 2008.

“In response to great user feedback, our plan is to proliferate Express Gate across our entire motherboard product portfolio, starting with over one million motherboards per month,” says Joe Hsieh, General Manager, ASUS Motherboard Business Unit. “Consumers want to turn their PCs on and off like any other appliance, and Express Gate has made that possible.”

Splashtop enables users to read e-mail, chat with friends, share photos, or surf the Web seconds after turning on their PC. DeviceVM works with a wide range of manufacturers to incorporate Splashtop into computers. The company plans to have numerous Splashtop-enabled motherboards, desktops, and laptops available internationally in 2008.

DeviceVM US Headquarters

1054 S. De Anza Blvd., Ste. 200, San Jose, CA 95129 tel: 408.861.1088 fax: 408.861.1087
