

DeviceVM works with Moblin to deliver instant-on, energy-efficient experience.

October 20, 2008 – SAN JOSE, CA – DeviceVM, a San Jose, CA-based company, and the maker of the award-winning Splashtop™ instant-on environment, announced that Splashtop is available for Intel® Atom™ processor-based devices such as netbooks and nettops, and will join the Moblin.org project by leveraging Moblin technologies, optimized for the Intel Atom processor, to deliver a ground breaking quick-boot and power efficient environment for Internet-centric devices. Moblin is an open source community project focused on building a Linux-based software platform optimized for Intel Atom processor-based devices such as netbooks, nettops, Mobile Internet Devices, and In-vehicle infotainment systems.

“We’re excited to be part of the Moblin community” says Mark Lee, CEO of DeviceVM, Inc. “Splashtop is a quick boot, eco-friendly platform that fits well with the innovation goals of the Moblin project, and we’re glad to contribute to the effort.”

"Rapid access to the Internet on Intel® Atom™ processor based MIDs and netbooks is what consumers want and is a growing part of the industry," says Ram Peddibhotla, director Open Source Technology Center, Intel Corporation. "Open source projects promote rapid innovation and we are glad to see companies like DeviceVM take advantage of the moblin.org community to deliver a satisfying internet experience."

DeviceVM works with numerous manufacturers to incorporate Splashtop into computers. Splashtop is available on a variety of motherboards, desktops, notebooks, nettops, netbooks, and other devices.

About DeviceVM

DeviceVM, Inc. is a privately held software company, selected by Dow Jones as one of the top 50 companies to watch for. With its 'instant-on' Splashtop product, DeviceVM is improving the every-day experience of computer users. Founded in 2006, DeviceVM is headquartered in Silicon Valley with offices in Taiwan and China.

About Splashtop

Splashtop is an award-winning 'instant-on' platform that improves the personal computing experience. Splashtop enables users to read e-mail, chat with friends, share photos, or surf the Web seconds after turning on their PC. Numerous Splashtop-enabled motherboards, desktops, and notebooks are available from the world's major computer manufacturers.
