

Splashtop Adopted by Sony Notebook PCs

Sony notebook PCs let customers access the Web in seconds using DeviceVM's award-winning Splashtop platform, branded Quick Web Access

June 23, 2009 – SAN JOSE, CA – DeviceVM, Inc. today announced that the Splashtop™ instant-on platform has been adopted by Sony VAIO NW series notebooks, for the first time. Splashtop allows consumers to surf the web seconds after powering on their notebooks, with just the touch of a button.

With Splashtop, consumers can easily surf the web, and enjoy their favorite browser-based activities including email, IM, streaming media like YouTube and Pandora, word processing services such as Zoho, video chat, and more, within seconds of powering up.

“We are excited that Sony VAIO series adopted our Splashtop technology,” says Mark Lee, CEO and co-founder of DeviceVM. “As smart phones and mobile devices become increasingly popular, consumers expect their notebooks to perform with the same speed and agility.”

Splashtop ships on millions of motherboards, netbooks, notebooks, desktops, and nettops already.

About DeviceVM

DeviceVM, Inc. is a privately held software company, selected by Dow Jones as one of the top 50 companies to watch. With its instant-on Splashtop product, DeviceVM is improving the every-day experience of computer users.
