

Your Family's Digital Protection

Shield helps protect the people you care about and lets someone they trust step in remotely when help is needed.

Protect what matters

Help keep family devices safe from viruses and online scams.

Know when something's wrong

Get alerted to suspicious activity.

Help family members from anywhere

Remote in securely and help when needed.

Online scams can affect any family

\$21B

Reported US scam losses in 2025, up 26% from the year before¹

22K+

Reported US scam losses in 2025, up 26% from the year before²

\$38K

Average loss for adults 60+, who lost a combined \$7.7 billion.³

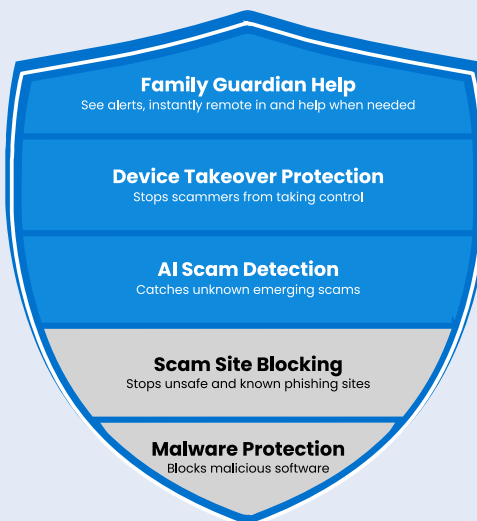

Protection beyond traditional Antivirus

From everyday antivirus to trusted family help, Shield adds protection for the moments you can't always see coming.

Splashtop Shield

All 5 Layers

 Splashtop Shield Exclusive

 Standard Protection

How Splashtop Shield works

1. Add your family

Invite the people and add computers you care about.

2. Shield protects

Protection runs automatically.

3. You get alerted

Know when something needs attention.

4. Step in and help

Connect securely from anywhere.

Real protection for real life

"I accidentally clicked something suspicious."

Helps identify unsafe websites and suspicious activity before more damage is done.

"My daughter downloaded an unfamiliar app."

Real-time protection helps detect malicious files and software.

"Mom was asked to install remote-access software."

Helps identify suspicious remote-access activity and notify someone she trusts.

"I am away and dad needs help with his computer."

A trusted family member can connect remotely and help without talking through every step.

Choose the protection that fits your family

Individual

Best for protecting yourself.

- Protect up to 2 computers
- Stops unauthorized remote access attempts
- Malware and anti-scam protection
- AI-assisted threat detection

Family Lite
