

One Platform. More Control. Less Chaos.

Manage endpoints, maintain security and compliance, and support end users from a single platform.

Everything You Need to Run IT Operations Efficiently

Automated Endpoint Management

Automate OS and third-party patching, enforce policies, run scripts, monitor alerts, and maintain real-time visibility into endpoint health to proactively manage systems at scale.

Security and Vulnerability Management

Identify vulnerabilities using CVE-based insights, prioritize risk, and take action while maintaining audit-ready visibility. Further extend protection with AV and EDR add-ons to strengthen your overall security posture.

Remote Access and Support

Quickly connect to devices with or without end users present to resolve issues faster and minimize downtime across distributed environments.

Customer Spotlight

"Splashtop Autonomous Endpoint Management solves the major challenge of managing and securing a distributed endpoint environment. It has helped us move from a reactive 'break-fix' support model to a proactive, automated one."

- **Ilan S., CTO/CIO**

"As a tech lead, one of the biggest challenges we face is maintaining visibility and control over a growing number of endpoints across distributed teams. Splashtop Autonomous Endpoint Management solves this by providing centralized, real-time monitoring and automation capabilities that significantly reduce manual overhead." - **Joseph K., Tech Lead**

Why Organizations Choose Splashtop

Tool Consolidation

Replace separate tools for remote support, endpoint management, remote access, and security with one unified platform, to simplify operations and reduce overhead.

Superior User Experience

Experience fast, reliable connections with high-quality performance and an intuitive experience across devices.

Responsive, Expert Customer Service

Get global phone and chat support from a team of experts that's easy to reach and quick to respond.

Flexible, Transparent Pricing

Get simple, competitive pricing that scales with your organization, no complex licensing.

For Remote Support

Support any device, anywhere, with or without an end user present
