

Splashtop Autonomous Endpoint Management

Empower your IT team and secure endpoints with real-time control, end-to-end visibility and AI-assisted automation

Streamline IT operations, automate routine tasks, and support users with high-performance remote access – all from within the Splashtop console.

Key features and benefits

- **Improved Visibility and Control:** Gain oversight of all endpoints with a single dashboard. Track assets, monitor security health, ensure compliance (ISO/IEC 27001, SOC 2, GDPR, HIPAA, PCI).
- **Endpoint Policies:** Enforce tailored security and configuration policies, including flexible patching rules like pre-approved versions, update rings, and automated approvals.
- **Patch Management:** Automate updates for operating systems, third-party and custom apps while ensuring critical patches are applied promptly on Windows and macOS.
- **AI-Powered Vulnerability Insights:** Quickly identify risks, assess impact, and prioritize vulnerabilities with CISA KEV and CVE summaries and recommended remediation actions.
- **Proactive Alerts and Remediation:** Identify and resolve issues quickly with configurable alerts and automations via smart actions.
- **Scripts and Tasks:** Streamline maintenance tasks by scheduling or instantly executing scripts and actions simultaneously across multiple endpoints.
- **Background Tools:** Access diagnostic tools such as task manager, registry editor, device manager, service manager and remote command without interrupting the end-user or starting a remote session.
- **Inventory Reporting:** Access detailed reports on system, hardware and software inventory for improved visibility, auditing and compliance.
- **Endpoint Security Dashboard:** Centralize endpoint protection with real-time threat detection, automated response, antivirus management for Splashtop AV and others.
- **Unattended Access and Control:** Remotely access Windows, Mac, Linux, servers and virtual machines from any device.

Who benefits

Splashtop AEM is ideal for MSP and IT teams looking to:

- **Automate endpoint management** by reducing manual work through policy-based patching, alerting, scripting, and complete visibility of your environment.
- **Improve security and compliance posture** with AI-powered CVE insights, patch SLA enforcement, and streamlined reporting for audits and cyber insurance.
- **Complement Microsoft Intune** by getting greater control with real-time patching for Win and Mac OS and third-party apps, immediate remediation, scripting, and complete inventory for all devices.
- **Replace legacy RMM tools** and consolidate into a single, modern platform focused on usability, automation, and cost efficiency.

“Our reliance on Intune for some endpoint management functionalities is supplemented by Splashtop, which fills critical gaps, including better visibility into and more control over software updates, and better documentation. In one platform, we are able to troubleshoot issues on any remote devices, proactively monitor systems, automate software patching, and ensure compliance.”

IT Manager
pb2 architecture + engineering

Level-up with Enterprise features

SSO/SAML Integration

Authenticate with Okta, Azure AD, OneLogin, JumpCloud, Workspace ONE, G Suite, and more for simplified access management.

Security and Access Controls

Strengthen security and compliance with cloud session recording, granular access permissions, SIEM integration, and IP whitelisting.

Remote Session Controls

Get unattended Android access, redirect USB devices (smart cards, security keys, stylus tools and more), use your local microphone as input on your remote computer, experience 4:4:4 color mode with high-fidelity audio, and more.

Integrations

Connect with ticketing and ITSM platforms for seamless remote support. Use open APIs to automate and integrate workflows.

Splashtop Connector

Get agent-free access to computers and servers via RDP, VNC, or SSH without VPN.

Unify further with add-ons

On-demand Support

Support unmanaged and mobile devices with multiple connection methods and Service Desk workflows. Control Windows, Mac, and Android devices, with view-only support for older Android and iOS, without any prior installation.

End-user Remote Work Licenses

Provide end users with high-performance remote access to computers managed by you, so they can work from anywhere.

Splashtop AR

Empower field support teams to troubleshoot issues faster with remote camera sharing and real time visual overlays.

Antivirus and EDR (Endpoint Detection and Response)

Protect endpoints with flexible solutions including next-gen Splashtop antivirus and EDR or 24/7 managed defense from SentinelOne, CrowdStrike and Bitdefender.

Licensing

Get flexible endpoint-based pricing with volume discounts that scale as you grow. Add On-Demand Support with concurrent session licensing, and named end-user licenses for remote work.

Visit splashtop.com/products/autonomous-endpoint-management to learn more, try for free, and purchase.

"Splashtop is the best tool in my belt. I used it for remote control, end-user support, patching all my apps, and inventory management. You guys are the most cost-effective and simple solution with the best customer support."

Cameron Montgomery, Owner
C.M. Computers Northwest LLC

Why choose Splashtop?

Unified IT Management

Combine remote access and support with endpoint management and endpoint security to keep devices updated, protected, and compliant across hybrid and remote environments.

Cost Effective & Scalable

Lower operational costs with competitive pricing while scaling across hybrid teams, remote environments, and large multi-OS device fleets.

Unmatched Customer Service

Get 24/5 expert support via phone, chat, or email. Resolve issues quickly and rely on proactive guidance to keep your organization resilient and productive.
