AI attacks fast. Intune + Splashtop move faster.

JAN 2027 Splashtop Remote Support launches directly from the Intune admin console

MOVE FASTER Shrink the time from issue to fix

Remote Support

Is supporting unattended, BYOD or cross-tenant devices a challenge?

Fix issues fast on any device, attended or unattended, with privilege elevation, file transfer, session recording and more.

In Intune · Jan 2027

AI App Packaging

Are third-party and custom app gaps leaving vulnerabilities open while you package by hand?

Deploy and patch 1,000+ ready-made and custom apps fast. AI packages, tests and malware-scans every app, then publishes to Intune in one click.

No E5 required

Real-Time Patching

Waiting on device check-ins to apply critical patches?

Patch Windows, macOS and third-party apps in real time, prioritized by KEV and CVE risk, with inventory and logs that prove every fix.

No check-in wait

ADD LAYERS One failed layer shouldn't mean a breach

Cloud RADIUS + PKI

Still relying on on-prem RADIUS or shared Wi-Fi passwords?

Passwordless, certificate-based Wi-Fi and VPN access, deployed through Intune. Less credential theft, no on-prem servers.

Pairs with Cloud PKI

Anti-Phishing

Is Defender your only line of defense against phishing and scams?

A second set of eyes on every click, side by side with Defender, managed in the same console as support and patching.

Shield first, Defender second
