

The self-hosted, on-premise remote access and remote support solution.

Highly secure, high performance remote access to physical and virtual desktops. Gives you and your team access to virtual machines and remotely control physical desktops. Also enables IT to remotely support attended and unattended devices.

The Simplest and Fastest On-Premise Remote Access and Support Solution

Leverage the power of Splashtop's secure technology to not only give employees remote access to their devices but also enable IT to remotely access and support devices.

Key Features and Benefits

- **High Performance** - Get [4K streaming at 40fps](#) and iMac Pro Retina 5K streaming at low latency. Reduced CPU utilization provides more headroom to process applications. Settings can be fine-tuned to get optimal performance. Optimized encoding and decoding engine takes advantage of the latest hardware acceleration from Intel, NVIDIA, AMD.
- **Multi-Monitor Support** - Remote into multiple monitors connected to your workstations.
- **Broad Device Support** - Remote into your Mac, Windows or Linux computer from any Mac, Windows, iOS, Android, or Chromebook device.
- **Active Directory Integration** - For ease of deployment and maintenance, Splashtop On-Prem can use Active Directory to easily provision user's accounts and authenticate / authorize each user session request.
- **Secure Connections** - Get secure infrastructure, intrusion protection, SSL/AES 256 bit encryption and other [advanced security features](#).
- **Unattended Android/ Rugged IoT Support** - Splashtop On-Prem provides remote access and remote support to any Android device from any computer or mobile device even without an end-user present. Android devices include smart phones, tablets, POS devices, kiosks, set top boxes and more.
- **Centralized Admin Console** - IT admins can easily deploy and manage employees' remote access to computers through a centralized console. They can also provide attended and unattended support to employees by remoting into their devices.

Who Benefits?

Organizations looking to give employees remote access to their devices as well as provide easy and secure remote support for devices.

- Executives can stay on top of business by remotely accessing and analyzing sensitive data securely from anywhere.
- Government field agents can access applications without downloading confidential information.
- Healthcare professionals can securely access patient records while maintaining confidentiality.
- Employees working remotely can access their computers with all their files and applications at their fingertips.
- IT Departments can remotely access and support unattended devices, as well as support unmanaged, attended computers on-demand.

Use customized controls for 3D CAD/CAM on iPad
