

The best-value, enterprise-class all-in-one remote computer access and remote support solution.

Enable employees to work remotely with unattended anytime computer access. Enable IT to remotely support computers and mobile devices. Provide students with scheduled access to lab computers.

All-in-One Remote Access and Support Solution with Robust Security and High Performance

Leverage the power of Splashtop's secure technology to not only give employees and students remote access to computers but also enable IT to remotely access, manage, and support devices.

Key Features and Benefits

- **High Performance** - [4K streaming at 40fps](#) and iMac Pro Retina 5K streaming at low latency. Reduced CPU utilization provides more headroom to process applications. Settings can be fine-tuned to get optimal performance. Optimized encoding and decoding engine takes advantage of the latest hardware acceleration from Intel, NVIDIA, AMD.
- **Secure Connections** - Secure infrastructure, intrusion protection, SSL/AES 256 bit encryption and other [advanced security features](#).
- **Broad Device Support** - Remote into your Mac, Windows or Linux computer from any Mac, Windows, iOS, Android, or Chromebook device.
- **Multi-Monitor Support** - Remote into multiple monitors connected to your workstations.
- **Scheduled Access** - Schedule times for when users can remotely access computers.
- **In-session Features** - Users can transfer files, chat, record session, and much more during a remote session.
- **Granular Permissions** - Provide role-based permissions for in-session features.
- **SSO/SAML Integration** - For ease of deployment and centralized authentication, Splashtop Enterprise integrates with Single Sign-On identity providers.
- **Group-based Permissions** - Assign permissions by user/computer groups.
- **Group-admin** - Create group-specific admins.
- **Centralized Admin Console** - IT admins can easily manage remote access to devices through a centralized console.

Who Benefits?

Organizations and educational institutions looking to give employees/students remote access to computers as well as provide easy and secure remote support for computers and mobile devices.

- Employees working remotely can access their work computers instantly, from anywhere.
- IT departments can remotely access, manage, and support unattended computers. They can also support unmanaged, attended computers and mobile devices on-demand.
- Educational institutions can easily schedule and manage students' and faculty members' remote access to on-campus computer labs, enhancing their distance and hybrid learning programs.

Use customized controls for 3D CAD/CAM on iPad

System Requirements

Client App Requirements

Remote Support Features (available in technician licenses)

- **Unattended Remote Support** - Unattended, anytime remote access into Windows, Mac, and Linux computers.
- **Unattended Android/ Rugged IoT Support** - Splashtop Enterprise provides remote access and remote support to any Android device from any computer or mobile device even without an end-user present. Android devices include smart phones, tablets, POS devices, kiosks, set top boxes and more.
- **Attended Remote Support** - Quick, on-demand access to Windows and Mac computers as well as iOS and Android devices with a 9-digit access code. Customize the SOS app with your own logo, color, instructions, and company name.
- **Remote Computer Management** - Send commands to an unattended remote computer's command prompt in the background, view Windows event logs, system/hardware/software inventory, endpoint security, and manage Windows Updates.
- **Integration with Ticketing and ITSM** - Splashtop Enterprise integrates with leading PSA ticketing and ITSM solutions providing easy access to starting a remote session. Session details are automatically logged in the ticket.

Pricing

Splashtop Enterprise is licensed per end-user for remote access and per concurrent technician for remote support use (includes additional remote support features). Both user types can be combined in a single instance. Annual and multi-year subscriptions are available.

Education licensing options include concurrent student licensing for school computer lab access, end-user licensing for faculty and staff, and concurrent technician licensing for IT and Support.

Contact us for pricing. **Save 50%** or more when compared to other enterprise-level remote access and remote support solutions.

Remote control computers and mobile devices as if you are sitting in front of them.
